SUMMARY

Creative and detail-focused UI/UX Designer and Frontend Developer with **3 years** of experience crafting responsive web and mobile applications. Skilled in **Figma, Adobe Suite, ReactJS, NextJS, JavaScript, and TypeScript**, with expertise in modern UI frameworks like **Tailwind CSS, Material-UI, and HeroUI**. Proven ability to bridge design and development for seamless user experiences across industries including service insurance, ERP, consulting, & astrology.

SKILLS SET

- **UI/UX & Design Tools:**

Figma, Illustrator, Photoshop, Canva

- **Frontend Development:**

ReactJS, NextJS, JavaScript (ES6+), TypeScript, HTML5, CSS3/SASS

- **Prototyping & Design Systems:**

Wireframing, User Flows, High-Fidelity Prototypes

- **Tools & Platforms :**

Git, Visual Studio Code

- **Soft Skills:**

Design Thinking, Teamwork, Adaptability, Problem-Solving, Time Management

WORK EXPERIENCE

Pragetx Softwares Private Limited

Jan 2023 - Jan 2026

- Designed and developed responsive web and mobile interfaces for **15+ projects** across domains such as insurance, ERP, consulting, healthcare, fantasy sports, and service-based platforms.
- Built scalable frontend architectures using ReactJS and NextJS, and created customized UI components using Material-UI, HeroUI, and TailwindCSS, following atomic design and modern component-based approaches.
- Integrated Three.js for 3D object rendering in web projects, delivering high-impact visual features like interactive 3D globes and animated containers.
- Delivered user-centered designs using Figma, Illustrator, and Photoshop, converting complex user requirements into clean, intuitive UI flows and interactive prototypes.
- Led design initiatives for social media creatives, including banners, carousel posts, story content, and ads for both internal branding and client campaigns.
- Created visual identities through logo design, product packaging, and brand assets that aligned with business goals and enhanced market presence.
- Collaborated with cross-functional teams including product managers, developers, and clients to gather requirements, run design sprints, and translate user research into pixel-perfect visuals.
- Delivered consistent brand storytelling through design systems and ensured cross-browser, device compatibility, and responsive UI implementation.
- Ensured cross-browser compatibility, responsive behavior, and performance optimization across devices for seamless user experiences.

Key Projects

- **Wah Smart Deals** – Designed end-to-end mobile app and web experiences for a community-driven deals and services marketplace. Created user and vendor flows, structured intuitive navigation, and delivered conversion-focused interfaces aligned with business goals and client requirements.
- **AgentX** – Led UI/UX redesign and frontend development of an AI voice-calling platform using Next.js. Improved overall usability, built scalable component-based interfaces, and optimized real-time dashboards and controls to deliver a faster, more intuitive experience for both admins and end users.
- **Bejoice Group** – Built a responsive logistics website using React, Tailwind, and Three.js. Integrated interactive 3D visualizations, including a globe and container tracking system, to present shipment routes and logistics data in a clear, engaging, and user-friendly way.
- **Infiniti Talks** – Designed a mental health and spiritual consultation platform for users and service providers. Created full mobile app experiences and a responsive website, later developed in Next.js, focusing on accessibility, trust-building visuals, and smooth content discovery.
- **ClickKasa** – Redesigned the complete user experience of an existing service-based platform, modernizing its visual identity and improving usability. Delivered end-to-end user flows, refined information architecture, and created a clean, accessible interface tailored to client goals.
- **Lighthouse Agency** – Designed brand identity, including logo and visual system, for a US-based insurance company. Created an informative, user-friendly website and developed it in Next.js, ensuring responsive layouts, clear service communication, and a professional digital presence.
- **PPP** – Designed a complete mobile-first ERP interface for stationery product distribution. Created end-to-end dashboards, inventory, sales, and role-based workflows that simplified complex operations and improved task efficiency for internal teams.
- **Car Dealer Portal** – Designed key platform modules for a vehicle buy, sell, and rental marketplace. Created tailored experiences for users, dealers, and admins, focusing on structured listings, intuitive filters, and streamlined management tools based on client requirements.

CERTIFICATIONS

Frontend Development - Tops Technology - Ahmedabad

December 2021 - August 2022

Completed a comprehensive certification program in Frontend Development, covering HTML5, CSS3, JavaScript, and ReactJS. Gained hands-on experience building responsive web applications and user interfaces.

EDUCATION

B.E in Chemical Engineering

2017 - 2021

Lukhdhirji Engineering College - Morbi

8.15 CGPA
